CONSUMERS' GOODS OUTPUT STILL POOR IN CHITA AND LENINGRAD

ORGANIZED PRODUCTION NECESSARY -- Zabaykal'skiy Rabochiy, No 92, 13 May 49

The majority of enterprises of light and local industry and of industrial and invalids' cooperatives in Chita Oblast are not meeting their plans, they have decreased the production level as compared with the first quarter 1948, and are lagging considerably behind other branches of the oblast's economy. The fact that many enterprises are producing goods not in demand by the population has made it necessary for trading organizations to import the needed goods from other parts of the country, thereby increasing costs and overloading transport facilities. The oblast imports great quantities of furniture, wheels, carts, harnesses, sewn goods, shoe polish, etc., which could be successfully produced in the oblast. Closer cooperation between trading organizations and enterprises producing consumers' goods must be established in order to organize the production and sale of goods and to increase the responsibility of enterprises for producing a wide assortment of high-quality products.

The condition of the consumers' goods enterprises demands improved organizational work by Party and soviet agencies. The assortment of goods must be immediately revised and quality improved, and continuous supplies of local raw materials must be provided.

However, Leningrad industry must treat this problem more seriously. Several plants have made initial preparations for producing consumers' goods for the home, but have not carried these plans through. No enterprises of the Ministry of Machine and Instrument Building have made any plans for such production.
